

Community & Knowledge Platform

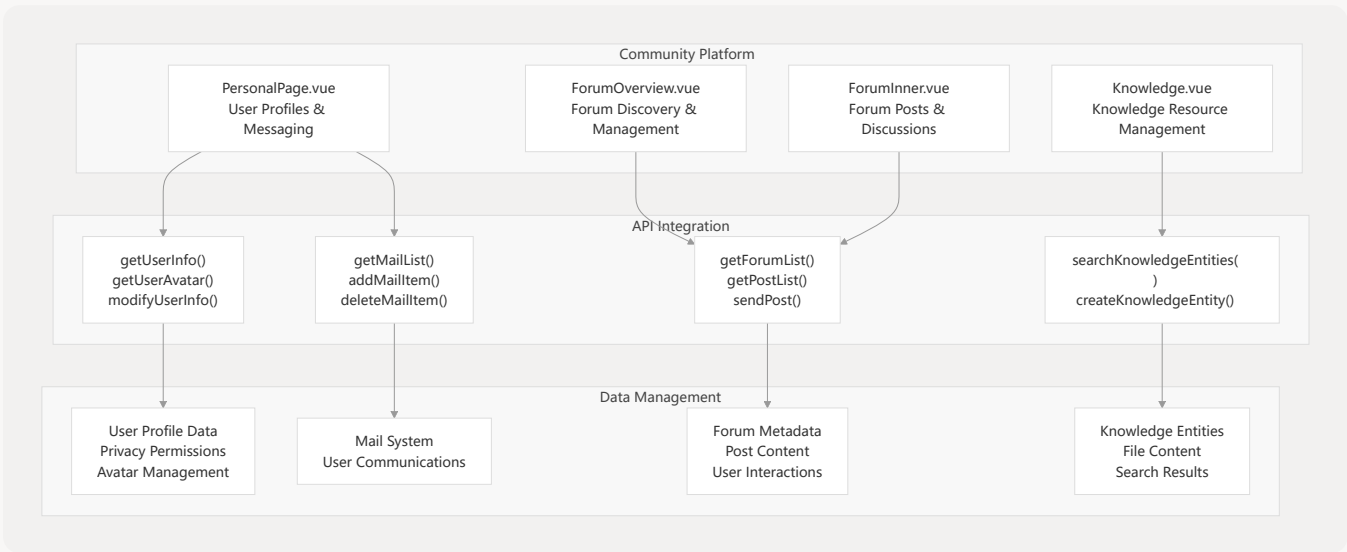

> Relevant source files

This document covers the frontend components responsible for community interaction and knowledge management within the MKTY system. This includes forum discussions, user profile management, inter-user messaging, and knowledge resource sharing capabilities.

For medical consultation features, see [Medical Consultation System](#). For task management functionality, see [Medical Records & Task Management](#).

Component Architecture

The Community & Knowledge Platform consists of four main Vue.js components that handle different aspects of user interaction and knowledge sharing:

- Sources:
- frontend/src/components/modules/PersonalPage.vue 1-576
 - frontend/src/components/modules/ForumOverview.vue 1-401
 - frontend/src/components/modules/ForumInner.vue 1-820
 - frontend/src/components/modules/Knowledge.vue 1-970

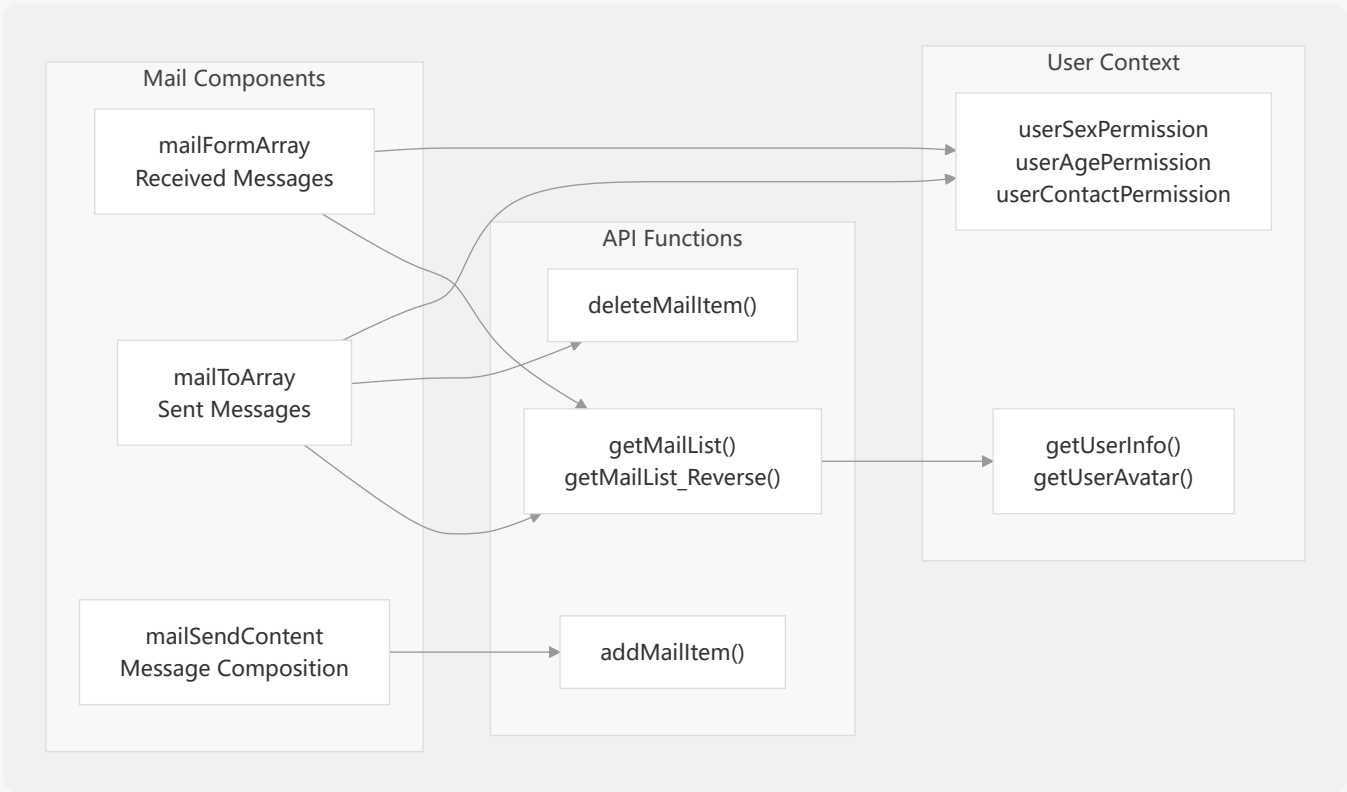

User Profile & Messaging System

PersonalPage Component Structure

The **PersonalPage** component manages user profiles and inter-user communication through a comprehensive messaging system:

Feature	Implementation	Code Reference
User Information Display	Dynamic computed properties with privacy controls	<code>frontend/src/components/modules/PersonalPage.vue</code> 80-149
Avatar Management	File upload with image processing	<code>frontend/src/components/modules/PersonalPage.vue</code> 247-256
Privacy Settings	Granular permission controls for profile fields	<code>frontend/src/components/modules/PersonalPage.vue</code> 304-308
Messaging System	Bidirectional mail with user popover details	<code>frontend/src/components/modules/PersonalPage.vue</code> 394-569

Message System Architecture

`frontend/src/components/modules/PersonalPage.vue` 49-52

Forum System

Forum Overview and Discovery

The **ForumOverview** component provides forum browsing and management capabilities:

Sources: `frontend/src/components/modules/ForumOverview.vue` 42-169

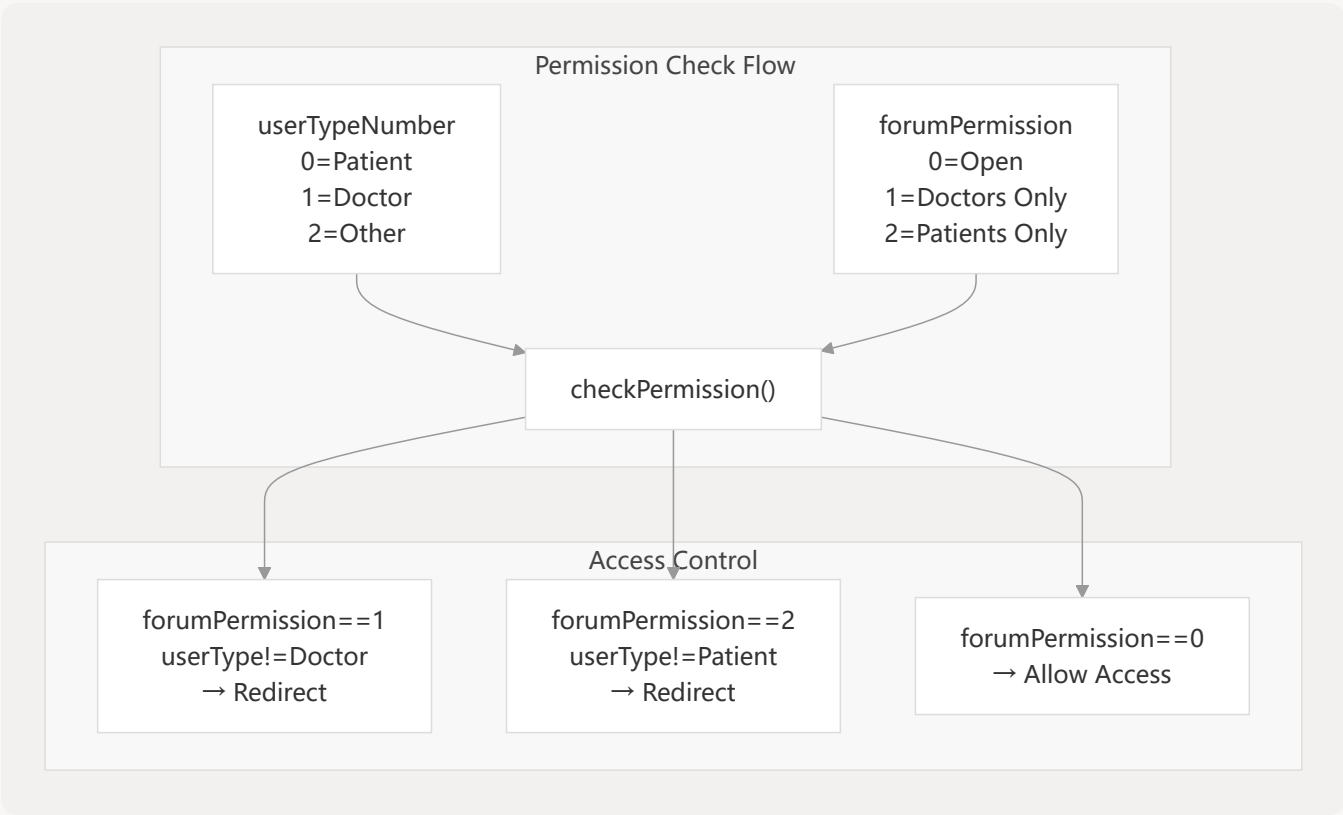

`frontend/src/components/modules/ForumOverview.vue` 24-34

Forum Discussion Interface

The **ForumInner** component handles individual forum interactions:

Component	Functionality	Code Reference
<code>ForumInner_Ar</code>	Post data array with user information	<code>frontend/src/components/modules/ForumInner.vue</code> 41
<code>fo_sendPost()</code>	Post creation with image support	<code>frontend/src/components/modules/ForumInner.vue</code> 339-354
<code>addImage()</code>	Image processing and upload	<code>frontend/src/components/modules/ForumInner.vue</code> 251-323
<code>praise()</code>	Post interaction system	<code>frontend/src/components/modules/ForumInner.vue</code> 237-250
<code>checkPermission()</code>	Access control validation	<code>frontend/src/components/modules/ForumInner.vue</code> 355-386

Forum Permission System

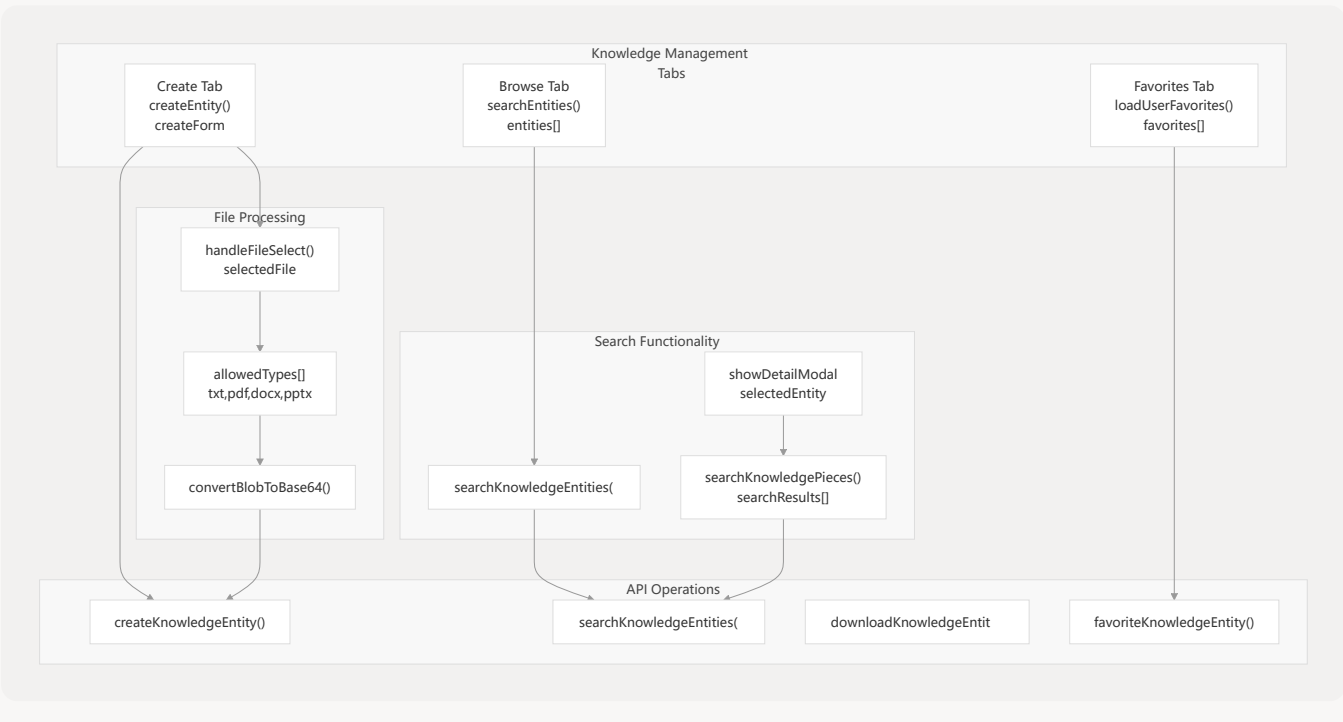

Sources: `frontend/src/components/modules/ForumInner.vue` 355-386

`frontend/src/components/modules/ForumInner.vue` 364-384

Knowledge Management System

Knowledge Entity Architecture

The **Knowledge** component provides comprehensive knowledge resource management:

Sources: frontend/src/components/modules/Knowledge.vue246–516

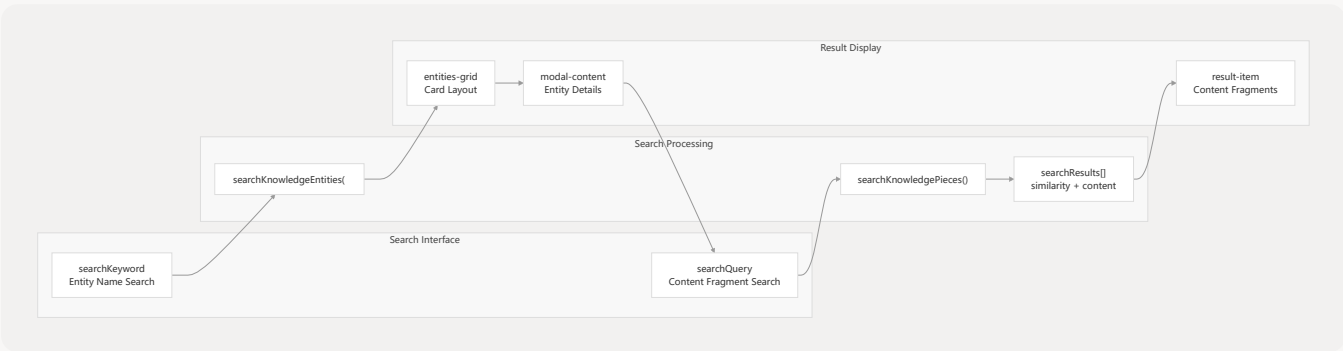

frontend/src/components/modules/Knowledge.vue327–345

frontend/src/components/modules/Knowledge.vue454–484

Knowledge Entity Data Structure

Field	Type	Purpose	Code Reference
keId	Number	Unique identifier	frontend/src/components/modules/Knowledge.vue51
keName	String	Entity name/title	frontend/src/components/modules/Knowledge.vue55
keAbstract	String	Description/summary	frontend/src/components/modules/Knowledge.vue64
keCreateTime	Timestamp	Creation timestamp	frontend/src/components/modules/Knowledge.vue58
keFileType	MIME Type	File content type	frontend/src/components/modules/Knowledge.vue181

Knowledge Search and Retrieval

Sources: frontend/src/components/modules/Knowledge.vue307–323

frontend/src/components/modules/Knowledge.vue454–484

frontend/src/components/modules/Knowledge.vue201–211

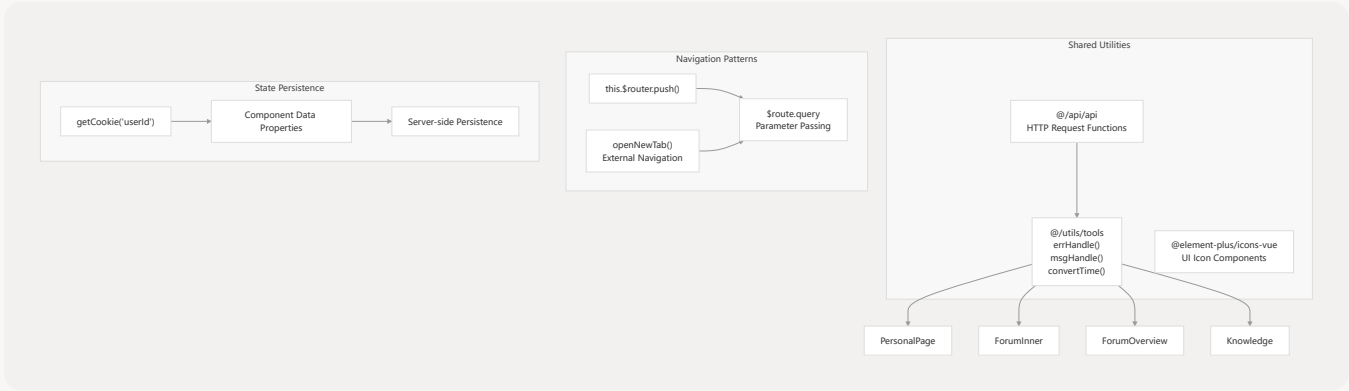

Component Integration Patterns

Navigation and State Management

The platform components share common navigation patterns and state management:

Pattern	Implementation	Components
Route Parameters	<code>this.\$route.query.userId</code> , <code>this.\$route.query.forumId</code>	PersonalPage, ForumInner
Cookie-based Auth	<code>getCookie('userId')</code> for authentication	All components
Modal Management	Boolean flags with overlay patterns	PersonalPage, Knowledge
Loading States	<code>Loading</code> with <code>LoadingText</code> for async operations	All components

Cross-Component Communication

Sources: `frontend/src/components/modules/PersonalPage.vue` 6-11

`frontend/src/components/modules/ForumInner.vue` 9-10

`frontend/src/components/modules/Knowledge.vue` 242-244
